

Bulletin on Current Literature of the National Society for Crippled Children and Adults

A Monthly Bibliography for Workers with the Handicapped

Vol. 10, No. 11-12

Monthly
One Dollar a Year

Nov.-Dec. 1949

AMPUTATION

703. Mueller, Emily E.

Lower extremity amputation; its effect on the location of the center of gravity of the body as a whole, on postural alignment and on stance stability; a preliminary report, by Emily E. Mueller and Ida M. Summers. Physical Therapy Rev. Oct., 1949. 29:10:454-459.

"The biomechanics of the stance of the lower extremity amputee is discussed in the light of the fundamental physiological mechanisms involved, and the methods developed for the direct experimental study of the amputee's adjustment to his disability are presented."

AMPUTATION--EQUIPMENT

See 720.

AMPUTATION---MEDICAL TREATMENT

704. Kessler, Henry H.

Rehabilitation of the arm amputee. New York State J. of Medicine. Aug. 15, 1949. 49:16:1921-1922. Reprint.

"In the rehabilitation of the arm amputee a five-point program is required: the psychologic preparation of the patient, the selection of adequate surgical methods which will give him a painless and satisfactory stump, the after-care of stump, the selection of a device or special surgical procedure which will permit him to wear a prosthesis, and, finally, the training of the amputee in the use of the prosthesis."

ARCHITECTURE (DOMESTIC)

705. Salmon, Christine F.

Design for a wheelchair house. Crippled Child. Oct., 1949. 27:3:14-19.

ARTHRITIS--MEDICAL TREATMENT

706. Elder, Max Q.

Summing up arthritis developments. Crippled Child. Oct., 1949. 27:3:12-13.

A report of the clinical success with ACTH and Cortisone in the treatment of arthritis and other diseases, and of the difficulties of production before the drugs can be made available generally to the medical profession.

ARTHRITIS—MEDICAL TREATMENT (Cont.)

707. Ratz, R. G.

The general practitioner and rheumatic disease. Diplomate. Oct., 1949. 21:6:216-221.

Reprinted from: Canadian Medical Association J. May, 1949.

Doctor-patient relations may become strained during the long period of professional care characteristic of rheumatic disease. It is felt that the soundest anchor for these relations is the establishment of patient confidence through a policy of complete honesty and sincerity.

BLIND—EMPLOYMENT

See 739.

BLIND—MENTAL HYGIENE

708. Lowenfeld, Berthold.

A psychological approach to blindness. J. of Exceptional Children. Oct., 1949. 16:1:1-6, 19.

The average person must realize that the blind are individuals and must be treated as such if they are to prove useful to themselves and the community. In considering blindness as a psychological phenomenon, three components are distinguished in this article: 1) the objective effects of blindness, 2) the subjective variables, and 3) the social factors.

BRAIN INJURIES—DIAGNOSIS

709. Brown, Joe R.

Localizing cerebellar syndromes. J. Am. Med. Assn. Oct. 22, 1949. 141:8:518-521.

"Based on present concepts of cerebellar anatomy, there are five recognizable pure cerebellar syndromes. In addition there are three variant localizing syndromes which result from associated implication of cranial nerves and brain stem structures. Illustrative cases are cited, prognosis is indicated, and the results of therapy are suggested."

CEREBRAL PALSY

710. Hansen, Ruth.

Louis Bear don't walk. Crippled Child. Oct., 1949. 27:3:10, 25.

An account of the treatment and training provided a little Chippewa-Crow Indian boy at the Billings, Montana, Cerebral Palsy Center.

CEREBRAL PALSY—DIAGNOSIS

711. Denhoff, Eric.

Diagnostic techniques for children with cerebral palsy. Rhode Island Med. J. Sept., 1949. 32:9:483-487, 522.

This presentation is based on data obtained from hospital and physicians' records, examinations, and observations of 37 cerebral palsied children treated at the Meeting Street School, Rhode Island's treatment center for cerebral palsied children sponsored by Crippled Children and Adults of Rhode Island, Inc. Dr. Denhoff draws the following conclusions: "1) A diagnosis of cerebral palsy may be made in infancy in the majority of children with the signs and symptoms that have been outlined. 2) A history should include information on familiar or genetic factors, maternal health, pregnancy, delivery and the neonatal periods. 3) A developmental history will often give leads in the diagnosis. The main ones are dates of development of head control, rolling, crawling, and standing with support. 4) Developmental tests which are essential in establishing a diagnosis have been outlined. 5) A short neurological examination, starting with the head and working downward, will invariably reveal signs of brain injury in those cases with suspicious histories or development tests."

Reprinted for distribution by the National Society for Crippled Children and Adults. Single copies free.

CEREBRAL PALSY--EQUIPMENT

712. Sokolov, June.

A rehabilitation workshop builds equipment for cerebral palsied children, by June Sokolov and Joan Roy. Crippled Child. Oct., 1949. 27:3:7-9.

A project has been developed at the Hartford County Rehabilitation Workshop, of the Connecticut Society for Crippled Children and Adults, for building special equipment for the cerebral palsied children of Connecticut.

CEREBRAL PALSY--MEDICAL TREATMENT

713. Carlson, Earl R.

Treatment of cerebral palsy. Brit. Med. J. Oct. 1, 1949. 4630:753-754.

An address before the British Council for the Welfare of Spastics, Sept. 21, 1949.

Dr. Carlson interprets the treatment of cerebral palsy as an educational problem as well as a medical problem. The part played by education in the improvement of muscle control is discussed along with drug therapy, physiotherapy and visual training.

714. House, Frederic B.

Management of cerebral palsy. J. of Michigan State Med. Society. July, 1949.

48:7:843-847. Reprint.

A paper directed to the general practitioner on the various aspects of the medical treatment and training of the cerebral palsied child and adult.

CEREBRAL PALSY--PSYCHOLOGICAL TESTS

715. Bice, Harry V.

Two steps toward improvement of psychological services for the cerebral palsied.

Am. J. of Mental Deficiency. Oct., 1949. 54:2:212-227.

One purpose of this paper is to suggest that the time has come when we should consider in more detail the subclassifications of the exogenous type of mental deficiency--cases in which prenatal, natal or postnatal injury to the brain is involved. The writer particularly urges psychologists and educators, in working with the cerebral palsied, to use the classifications now employed by the American Academy for Cerebral Palsy. He asks for coordination of research and pooling of knowledge on the psychological aspects of the cerebral palsied.

CEREBRAL PALSY--SPECIAL EDUCATION

716. Taibl, Anna Belle Crozier.

The academic challenges of the ataxic child. J. of Exceptional Children. Oct., 1949. 16:1:11-14, 32.

The most essential factor in teaching the ataxic child is to "know your child." In a sincere desire to accomplish this end it is necessary to have a coordinated program, taking into consideration the total child--his physical characteristics, educational potentialities, and emotional needs.

CHILD CARE

See 773.

CHILD WELFARE--CONFERENCES

See 771.

CHILDREN'S LITERATURE--BIBLIOGRAPHY

717. New Jersey. New Jersey Library Association. Children's Section.

Counterpane fun; a book list for convalescent children. (Trenton), The Assn., 1949. Folder.

Copies available from the Children's Department, Public Library, Trenton, New Jersey, at 15¢ each.

CHRONIC DISEASE--INSTITUTIONS--NEW YORK

718. New York. Montefiore Hospital, New York City.

Home care; origin, organization and present status of the extra-mural program of Montefiore Hospital. New York, The Hospital, 1949. 56 p.

A compilation of reprints of recent magazine articles which describe the Montefiore plan of home care of the convalescent or chronically ill patient.

Available from Montefiore Hospital for Chronic Diseases, The Bronx, New York 67, N.Y.

CHRONIC DISEASE--SPECIAL EDUCATION

719. Berkowitz, Bertha.

A program of continued education for the chronically ill. J. of Exceptional Children. Oct., 1949. 16:1:15-16, 32.

Dr. Elena D. Gall originated the plan for a program of continued education for the chronically ill at the Goldwater Memorial Hospital in New York City. The program reaches out to hospitalized people who can not participate in the usual type of adult education.

CLOTHING

720. U. S. Air Force. Air Materiel Command.

Memorandum report on quadrilateral amputee civilian clothing. Dayton, O., The Command, 1948. 24 p. (MCREXD-666-24). Mimeo.

A report of the research project the purpose of which was to design and develop patterns for civilian clothing modified for the convenience of war veteran quadrilateral amputees employing prosthetic appliances. Illustrated.

CONVALESCENCE--INSTITUTIONS--NEW JERSEY

721. Lebov, Sylvan.

Miracle home by the sea. Hygeia. Nov., 1949. 27:11:774-776.

The story of the Betty Bachrach Home, one of the best equipped institutions in the country for the treatment and aftercare of those stricken with infantile paralysis, tuberculosis of the bone, rheumatic heart, arthritis, fractures and other crippling conditions.

CONVULSIONS

722. American Academy of Pediatrics, Inc.

Round table discussion: Convulsive disorders in children. Pediatrics. Nov., 1949. 4:5:677-688.

Presented at the Annual Meeting of the American Academy of Pediatrics, Atlantic City, N.J., Nov. 21 and 22, 1948, and concerned primarily with the following aspects of the problem: 1) etiology, 2) treatment, including drugs and psychogenic factors, 3) prognosis.

723. Lennox, Margaret A.

Febrile convulsions in childhood; their relationship to adult epilepsy. J. of Pediatrics. Oct., 1949. 35:4:427-435.

"Clinical histories of patients with febrile convulsives are compared with the histories of patients with epilepsy whose first convulsions were febrile...The prevention of epilepsy requires the prevention of prolonged fever in children under the age of one year and of prolonged or focal convulsions in children under the age of 3 years."

724. Shanks, Robert A.

The nature of infantile convulsions. Am. J. of Diseases of Children. Nov., 1949. 78:5:763-774.

"A simple classification of convulsions is tentatively suggested, namely, that convulsions may be classed as either (a) spontaneous or (b) provoked. The prognosis of convulsions varies inversely with the degree of provocation."

DEAF-LIP READING

725. Glorig, Aram.

Visual aids in speech reading instruction. Hearing News. Oct., 1949. 17:10:1,16.

This article discusses a number of visual aids that are being developed as methods in the teaching of speech reading in the Audiology Center at the Walter Reed General Hospital.

In same issue: How we use the tachistoscope, by Florence T. W. Woolley, p. 3-4; The Barn Theatre presents a visual aid, by Evaline Rae, p. 5,14,16.

DEAF-BLIND--EMPLOYMENT

726. Bryan, Dorothy.

Work opportunities for the deaf-blind. Outlook for the Blind. Oct., 1949. 43:8:219-222.

The two-fold barrier to work opportunities for the deaf-blind in business and industry are discussed in this article.

DENTAL SERVICE

727. Album, Manuel M.

Dentistry adapted to cerebral palsy. Crippled Child. Oct., 1949. 27:3:11, 30.

The author proposes to point out some of the precautions that should be taken in treating cerebral palsied patients and some of the techniques that are emphasized at the Dental Clinic of the Philadelphia Society for Crippled Children and Adults.

DIABETES

728. Burch, Lewis J.

Diabetes in childhood, by Lewis J. Burch and Isabella C. Miller. Hygeia. Nov., 1949. 27:11:760-761.

A brief article describing the problems of the young diabetic, the effects of protamine zinc insulin as a control and the part played by the parents in the adjustment of the child.

EMPLOYMENT

729. Public Welfare in Indiana. Oct., 1949. 59:10:3-14.

Entire issue devoted to the subject of employment.

Partial contents: Handicaps in terms of employability, by George A. Mead. The key to proper job placement, by Emet C. Talley. Second injury fund provisions, by Emanuel F. Miller. Training services provided by the division of vocational rehabilitation, by Ort L. Walter. Employers' experiences with physically handicapped workers, by Kenneth R. Miller.

EMPLOYMENT--PROGRAMS--NEW YORK

730. Industrial Bul., New York State Dept. of Labor. Oct., 1949. 28:10:11-36.

Title of issue: Rehabilitation of the handicapped.

Partial contents: Rehabilitation vs. dependency; Selective placement; A new direction at Saranac; - Follow-through for success; Back to work; Independence for the blind; Objectives--Rehabilitation.

EPILEPSY

See CONVULSIONS.

EPILEPSY--SOCIAL SERVICE

731. Cummins, Jean.

The family as a factor in the epileptic's social adjustment. J. of Social Casework. Nov., 1949. 30:9:384-387.

Approximately 25 patients were interviewed at the Seizure Clinic of the University of Minnesota Hospitals to determine the extent of family adjustment problems. The results are recorded in this article under the aspects of illness, school, employment and social life.

EPILEPSY—SOCIAL SERVICE (Continued)

732. Davidson, Elabel McL.

A social study of epileptic patients, by Elabel McL. Davidson and Joan C. Thomas. J. of Social Casework. Nov., 1949. 30:9:380-384.

"The purpose of the social study on which this article is based was to create an awareness and understanding of the problems of epileptic patients rather than to test any hypothesis. The emphasis was on the individual patient, his problems and their implications." An article based upon the report listed below (see 733).

733. Thomas, Joan C.

Social problems of the epileptic patient; report of a medical-social study, by Joan C. Thomas and Elabel McL. Davidson. Montreal, Montreal Neurological Institute, 1949. 64 p. Printed in English and French.

"This is a report of a medical-social study of 178 patients who have epileptic seizures...Within recent years medical progress in the alleviation of epileptic seizures has highlighted the role of social factors in the illness. In fact, it has been said that the handicap of epilepsy is primarily social rather than medical... This medical-social study has, therefore been undertaken through a realization of the pressing social needs of the epileptic patient. We have tried to learn and point out what these needs and difficulties are, why they exist, what resources in our community are already attempting to meet them and wherein a lack exists. Definite recommendations have been made on the basis of the material."

FOOT

734. McCormick, Donald W.

Metatarsus adductovarus; "skewfoot," by Donald W. McCormick and Walter P. Blount. J. Am. Med. Assn. Oct. 15, 1949. 141:7:449-453.

Metatarsus adductovarus is an exceedingly rare congenital deformity. The disease is discussed here in relation to prevalence, pathology and treatment.

HANDICAPPED—EQUIPMENT

735. Outwitting Handicaps. 44th issue, 1949. pp. 1-35.

Entire issue devoted to brief articles on specialized equipment, biographical sketches, and other informational articles of interest to the severely handicapped.

Available from We The Handicapped, Inc., 15327 San Juan Drive, Detroit 21, Michigan, at 25¢ a copy.

HANDICAPPED—LEGISLATION

736. Who wants a federal commission on services for the handicapped? J. of Rehabilitation. Oct., 1949. 15:5:2-3. An editorial.

Reasons are given why House bill HR 3095 is considered unworthy of support by responsible organizations and individuals interested in the welfare of the handicapped.

HANDICAPPED—PROGRAMS—FLORIDA

737. Florida. Florida Children's Commission.

Proceedings of the conference on services to crippled children in Florida. Tallahassee, The Commission, 1949. 183 p.

The health problems of Florida's Children are reviewed with panel discussions on 1) Discovering and defining the problem; 2) Diagnostic resources and procedures; 3) Treatment resources; 4) Handicapping conditions other than orthopedic; 5) Public education for the handicapped; and 6) Related problems.

Available from The Florida Children's Commission, Tallahassee, Florida.

HEAD INJURIES--HISTORY

738. Courville, Cyril B.

Injuries to the skull and brain in ancient Egypt; some notes on the mechanism, nature, and effects of cranial injuries from predynastic times to the end of the Ptolemaic period. Bul., Los Angeles Neurological Society. June, 1949. 14:2:53-85. Reprint.

The attitude of the ancient people toward cranial injuries is observed from a study of weapons, helmets, methods of warfare, and particularly the practice of destroying their prisoners. Much information is contributed from the abundant skeletal material and in the inscriptions on monuments and papyri on this subject.

HOMEBOUND--EMPLOYMENT

739. Townsend, M. Roberta.

Homework as it relates to the workshop. Outlook for the Blind. Oct., 1949. 43:8:229-231.

A study of what would be involved in the incorporation of homework for the blind into the program of the National Industries Bureau.

HOMEBOUND--SPECIAL EDUCATION

740. Farr, Muriel.

The sick child and his schoolwork. Nat. Parent-Teacher. Oct., 1949. 44:2:20-21.

"It can be serious business, this being too ill for school. One child may fret himself weak at the interruption; another may regard his enforced vacation as an unexpected gift from heaven. Either attitude may have troublesome repercussions. In this article the reader will find a sensible approach to a crisis that cannot be left to chance and the child."

741. Parker, Jessie M.

School goes to the child, by Jessie M. Parker and W. A. Winterstein. Crippled Child. Oct., 1949. 27:3:26-27.

An explanation of the School-to-Home telephonic communication system, used in the last ten years in Iowa, where approximately 1000 homebound children have received regular classroom instruction.

HOSPITALS--PHYSICAL THERAPY DEPARTMENT

742. Peters, Joseph P.

The physical therapy department from an administrator's viewpoint. Physical Therapy Rev. Oct., 1949. 29:10:450-453.

Attention is focused on the importance of sound organizational goals and well defined policies adapted to the individual needs and to aims of the physical therapy department.

JUVENILE DELINQUENCY

See 767.

MENTAL DEFECTIVES--EMPLOYMENT

743. DeMichael, Salvatore G.

The state-federal program of vocational rehabilitation for the mentally retarded. Am. J. of Mental Deficiency. Oct., 1949. 54:2:230-236.

This article aims to indicate the small measure of attention which is being accorded to the mentally retarded in the vocational rehabilitation program, briefly to describe the services which are available, and to highlight the vital need for co-operation between the American Association on Mental Deficiency and the state-federal program of vocational rehabilitation.

MENTAL DEFECTIVES--PARENT EDUCATION

744. New Jersey. Department of Institutions and Agencies.

Parents groups for the mentally retarded; what they are, what they can accomplish, how to form them. Trenton, The Dept., (1949). (11) p. Mimeo.

"This manual is published in the hope it will find wide use in the organization and functioning of groups of individuals who are interested in the mentally retarded." Offers practical suggestions as to how to organize and conduct a parents' club for the mentally retarded.

Available from the New Jersey Department of Institutions and Agencies, Division of Classification and Education, Trenton, New Jersey. Free.

MENTAL DEFECTIVES--PROGRAMS

745. Rautman, Arthur J.

Society's first responsibility to the mentally retarded. Am. J. of Mental Deficiency. Oct., 1949. 54:2:155-162. Reprint.

It is the responsibility of society, first, to understand both the limitations and the potentialities of the individual who has less than average ability, and secondly, to determine how his adjustment to the world of every-day living can be made easier both for himself and for those whose lives are touched by his.

MENTAL DEFECTIVES--SPECIAL EDUCATION

746. Rosenzweig, Louis E.

Present and future of special education, by Louis E. Rosenzweig and Charles I. McAllister. Am. J. of Mental Deficiency. Oct., 1949. 54:2:192-197.

The present and future status of education in the field of mental deficiency is built on the following principles: 1) Contribution to society is the motivating factor; 2) the retarded constitute a heterogeneous group; 3) the retarded need special developmental programs; 4) the majority of retarded can be trained to work in the unskilled employment areas.

MENTAL HYGIENE

747. Guensberg, Marcus.

Emotional problems in handicapped children. (Honolulu, Hawaii Chapter, NSCCA, 1949). 8 p. Mimeo.

The emotional needs of the handicapped child are discussed in comparison with the needs of the child without a handicap. The mental mechanisms or psychological devices employed by the handicapped child to re-establish an equilibrium that he lost—or never acquired—due to illness, injury or a congenital defect are identified and explained.

A paper read before the annual meeting of the Hawaii Chapter, National Society for Crippled Children and Adults. Available from The Chapter, P.O. Box 2688, Honolulu 3, Hawaii. Free.

748. Pennsylvania. Woods Schools. Child Research Clinic, Langhorne.

The emotional climate of the exceptional child. Langhorne, The Schools, 1949. 50 p.

Proceedings of the Spring Conference, April 1949.

Contents: The social group, by Robert Coleman Longan, Jr.; The place of the exceptional child in the family structure, by Leo Kanner; The church, by George A. Walton; Problems of the parents, by Richard L. Frank; A concept of possible mechanisms underlying unexplained congenital defects, by Charles C. Chapple; Community planning, by Joseph Barrett.

The Proceedings are available from Charlotte E. Grave, Director, Child Research Clinic, The Woods Schools, Langhorne, Pa. Free.

MENTAL HYGIENE (Continued)

See also 754.

MONGOLISM

749. Warner, Robert.

Mongolism in one of twins and in another sibling; report of a case. Am. J. of Diseases of Children. Oct., 1949. 78:4:573-588.

"Cases of 2 or more mongoloid siblings in the same family are tabulated. A case history of a family is presented in which 2 siblings were mongoloid—one being a twin.

"Several of the theories of the causation of mongolism are considered and are found to be compatible with the circumstances in the case presented."

NURSERY SCHOOLS—EQUIPMENT

750. Association for Childhood Education International.

Recommended equipment and supplies for nursery, kindergarten, primary and intermediate schools; rev. Washington, The Assn., 1949. 44 p. (General service bul.) \$1.00.

"This bulletin should prove valuable to those, who year after year, purchase equipment and supplies for the elementary school, to those teachers who are privileged to select equipment and supplies used in their classrooms, and to those who are studying and preparing to teach."

OBESITY

751. Lewin, Philip.

Obesity and joint trouble. Hygeia. Nov., 1949. 27:11:766-767, 784, 786-787.

Advice for the overweight individual who is warned of bone and joint disorders due to excess weight.

PARAPLEGIA—MEDICAL TREATMENT

752. Kurfees, James G. and others.

Anesthesia for the paraplegic patient, by James G. Kurfees, Scott Whitehouse and Frank Cersizmo. J. Am. Med. Assn. Nov. 5, 1949. 141:10:638-640.

"A study is presented of problems of anesthesia in one hundred and sixty-seven surgical operations performed on 49 paraplegic patients."

PSYCHOLOGICAL TESTS

753. Bice, Harry V.

Interpretation of psychological examinations. Public Health Nursing. Oct., 1949. 41:10:542-545.

Through skillful administration and apt interpretation by both psychologist and nurse, the psychological examination may contribute immeasurably to the adjustment of the child and his family.

PSYCHOLOGY

754. Cruickshank, William M.

A study of the emotional needs of crippled children, by William M. Cruickshank and Jane E. Dolphin. J. of Educational Psychology. May, 1949. pp. 295-305. Reprint.

The results of a test of emotional needs administered to 87 crippled children are reported in this article. Children suffering from cardiac disorders were revealed to have less feelings of fear than children with cerebral palsy and poliomyelitis.

See also 747/

RECREATION—PROGRAMS—NEW YORK

755. Samuel, Susan.

Recreation for the orthopedically handicapped child. Recreation. Oct., 1949. 43:7:326-327.

An article describing the activities and aims of the Carolians, a recreation group for orthopedically handicapped boys and girls, sponsored by the New York Philanthropic League.

REHABILITATION

See 775.

REHABILITATION—BIBLIOGRAPHY

756. National Society for Crippled Children and Adults.

Books in print on rehabilitation; an annotated list of selected titles from the library of the National Society for Crippled Children and Adults. Chicago, The Society, 1949. 21 p. Mimeo.

A checklist of the books selected for display at the 28th Annual Convention, Commodore Hotel, New York City, Nov. 7-10, 1949. Gives necessary information for the ordering of books through the local book store or directly from the publisher. Single copies free.

REHABILITATION CENTERS—GREAT BRITAIN

757. Thompson, A. R.

Engineering methods in occupational therapy and industrial rehabilitation. Industrial Medicine and Surgery. Sept., 1949. 18:9:385-390.

Vauxhall Motors, Ltd., Luton, Bedfordshire, England.

(See also next article below, #758).

758. ———.

An industrial accident and rehabilitation service, engineering methods in occupational therapy. Brit. J. of Physical Medicine. Sept.-Oct., 1949. 12:5:114-121. Vauxhall Motors, Ltd., Luton, Bedfordshire, England.

"An industrial accident and rehabilitation scheme has been described, and a brief analysis of the type of case dealt with over a period of 2 years and 8 months is given....Emphasis is placed on the importance of the minor injury as a cause of much needless disability in industry."

RHEUMATIC FEVER—MEDICAL TREATMENT

759. Jackson, Robert L.

Treatment of acute rheumatic fever and prevention of recurrences. J. Am. Med. Assn. Oct. 15, 1949. 141:7:439-445.

For the purpose of discussion the disease has been divided into five phases: the phase of invasion of the inciting agent, the phase of latency between the invasion and the development of symptoms and signs of the disease, the phase of acute activity, the prolonged phase of subacute activity and the phase of inactivity.

RICKETS—STATISTICS

760. Ranstrom, Stig.

Rickets in newborn infants; clinical and histologic study, by Stig Ranstrom and Gert von Sydow. Pediatrics. Oct., 1949. 4:4:406-411.

"In a series of 181 consecutive cases of infants who had died soon after birth, 103 (56.9%) showed definite histologic signs of rickets. Of the 69 infants dying during the first day of life, 20 (29%) had rachitic changes and in these the rickets must be regarded as congenital. The incidence of rickets was about the same in the premature and the full term infants, in this material." A report of a study made at Children's Hospital, Gothenburg, Sweden.

SHELTERED WORKSHOPS

See 712.

SOCIAL SERVICE (MEDICAL)

See 776.

SOCIAL WELFARE--PLANNING

761. Derryberry, Mayhew

Health is everybody's business. Public Health Reports. Oct. 14, 1949. 64:41:1293-1298.

Today progress in public health is not provided merely by mass disease control through enforcement of sanitation regulations. Public health workers should capitalize on the expanding interest of citizens in health problems and bring about constructive group thinking and planning.

SPECIAL EDUCATION

762. Understanding the child. Oct., 1949. 18:4:97-116.

Title of issue: Special education.

Partial contents: Freeing the handicapped for a free society, by E. B. Whitten; Education for emotional and economic security, by Edward H. Stulken; Educational needs of exceptional children, by Elizabeth McCain; The hard-of-hearing child at home and in school, by Mary Martin; Organizing a special class for slow-learning children, by Mary Maude Birmingham.

See also 777.

SPECIAL EDUCATION--INDIANA

763. Indiana. Board of Education, South Bend.

Special education in South Bend; a handbook for parents and teachers. South Bend, The Board, 1949. 49 p., illus.

The function of this booklet is to explain the methods followed in South Bend in serving children who have physical, visual, auditory or speech handicaps. Among points touched upon are: location of the schools in question; facilities and equipment; transportation; methods of administration within the building; samples of forms used; therapy; results.

Booklet available from Superintendent of Schools, School City of South Bend, South Bend, Indiana. Free.

SPECIAL EDUCATION--INSTITUTIONS--GREAT BRITAIN

764. Crawford, Mary A.

Trefoil School for physically handicapped children. Brit. J. of Physical Medicine. Sept.-Oct., 1949. 12:5:136.

An interesting article on a school in Edinburgh, Scotland which aims to teach independence and to develop interests and abilities in crippled children up to 16 years. The school was sponsored by the Education Authority of Edinburgh and staffed by adult members of the Girl Guide Movement.

SPEECH CORRECTION

765. Huber, Mary W.

Speech and vocational placement. Crippled Child. Oct., 1949. 27:3:20-23.

A discussion of the place of speech correction in a vocational rehabilitation and guidance program.

VETERANS (DISABLED)—STUDY UNITS AND COURSES

766. (Disabled American Veterans).

Unit of study: The disabled veteran. (Cincinnati), The DAV., (1949). 23 p. Mimeo.

The purpose of this unit is not only to impart information about the disabled veteran and his problems but, to develop in the pupils—our future citizens—an understanding of the continuing obligation of society to the handicapped veteran.

Available from National Publicity Office, Disabled American Veterans, 11 S. La Salle St., Room 2801, Chicago 3, Ill. Free.

VOCATIONAL GUIDANCE

767. Fantl, Kurt, and others.

Vocational counseling in the rehabilitation of disturbed and delinquent boys, by Kurt Fantl, Leonard Small and Richard Robinson. Mental Hygiene. Oct., 1949. 33:4:615-628.

A progress report is presented here designed to estimate the effectiveness of aid given to disturbed and delinquent boys, during their stay on a psychiatric observation ward, that will facilitate their adjustment and prevent further delinquencies.

VOCATIONAL REHABILITATION

768. Hall, W. Earl.

The road back from the accident to job or school. Crippled Child. Oct., 1949. 27:3:4-6.

Briefly stated, W. Earl Hall points out the "road back" after a laborious and costly accident. Returning the disabled to his rightful place in society through rehabilitation has been found to be less costly than having the individual rely on the state for relief.

VOCATIONAL REHABILITATION—DISTRICT OF COLUMBIA—SURVEYS

769. Solon, Jerry.

Report on client opinion; a District of Columbia survey. J. of Rehabilitation. Oct., 1949. 15:5:4-12.

A study undertaken by the District of Columbia Rehabilitation Service in which 227 clients appraised the services of the agency. The opinion of 88% were predominately favorable.

VOLUNTARY HEALTH AGENCIES

770. Neff, J. Louis.

Role of the voluntary agency in the overall health program. Am. J. of Public Health. Oct., 1949. 39:10:1284-1288. Reprint.

The triangle illustrates the interdependence of the three groups involved in the health programs of this country: one arm is the volunteer health agency, the other is the official agency, and the base is the medical profession. Vital to the success of the services of the other two arms is the role of the voluntary health agency in creating the demand for health services, in providing financial support, and in making available the enthusiastic and devoted work of its volunteers.

WHITE HOUSE CONFERENCE ON CHILDREN AND YOUTH—1950

771. Ewing, Oscar R.

Midcentury White House Conference moves forward; the task of the National Committee. Child. Oct., 1949. 14:4:50-52.

In the same issue: Summing up the previous White House Conferences, by Katharine F. Lenroot, p. 52-54. To focus on child's mental, emotional and spiritual growth and development, by Melvin A. Glasser, p. 54-55, 61.

WHOOPIING COUGH

772. Globus, Joseph H.

Encephalopathy following pertussis vaccine prophylaxis, by Joseph H. Globus and Jerome L. Kohn. J. Am. Med. Assn. Oct. 22, 1949. 141:8:507-509.

"Two cases are described in which manifestations of cerebral involvement followed inoculation with pertussis vaccine. In one instance the reaction was at least partly reversible, but in the other there was a fatal termination."

NEW BOOKS IN THE LOAN LIBRARY

CHILD CARE

773. Dunbar, Flanders.

Your child's mind and body; a practical guide for parents. New York, Random House, 1949. 324 p. Bibliography: pp. 295-297. \$2.95.

"All parents, actual and prospective, will find in Dr. Flanders Dunbar's new book practical answers to the urgent emotional problems of infancy and childhood." This new guide in the field of child care is clear, simple, direct and to the point, and above all notable for its commonsense.

PSYCHOLOGY

774. Pennington, L.A., ed.

An introduction to clinical psychology, edited by L.A. Pennington and Irwin A. Berg. New York, The Ronald Press Co., 1948. 595 p. \$5.00.

An introductory textbook for a first course in clinical psychology, consisting of papers contributed by recognized psychologists. The book is divided into 5 parts: Introduction, clinical problems, clinical methods, psychotherapy, and professional relationships. Chapter 6, "The Physically Handicapped," (p. 107-137) is by Stanley S. Marzolf.

REHABILITATION

775. Soden, William H., ed.

Rehabilitation of the handicapped; a survey of means and methods. Foreword by Sidney Licht. New York, The Ronald Press, 1949. 399 p. \$5.00.

This book, consisting of papers written by well-known authorities in the field of their specialties, brings under one cover representative accounts of modern procedures now being used successfully in the mental and physical rehabilitation of disabled persons. The scope of the articles begins with the medical, surgical, and psychiatric techniques, and continues with the vocational, social, educational, and psychological procedures which help to develop limited abilities.

SOCIAL SERVICE (MEDICAL)

776. Upham, Frances.

A dynamic approach to illness; a social work guide. New York, Family Service Association of America, 1949. 200 p. \$3.00.

"This volume is an attempt to bring together some of the current concepts of ways of restoring ill or handicapped persons to a maximum of social functioning. The material, based on an extensive bibliography, was selected and organized to illustrate the interaction of various factors—physical, emotional, economic, and social—in the etiology and treatment of illness. The role of the social worker in extending help to patients and families in the myriad of interacting factors is the central theme of the book."

SPECIAL EDUCATION

777. Wallin, J. E. Wallace.

Children with mental and physical handicaps. New York. Prentice-Hall, Inc., 1949. 549 p. \$6.65.

"This book attempts to supply the need for an up-to-date reference book for the intelligent lay reader and particularly for the professional workers in the field of special education, handicapped children, mental defect, clinical and abnormal psychology, and pediatrics."

BULLETIN ON CURRENT LITERATURE

The publications listed in this issue have been received by the library of the National Society for Crippled Children and Adults and are available for loan. The library does not stock copies for sale. Prices are listed, when known, so that orders may be addressed directly to the publishers. The publications are listed by author and title under the subject heading by which the item is cataloged and filed in the library. The subject headings in the Bulletin can be identified by being in all-capital letters.

Because the library may have only a limited number of copies of any item listed, and because of the great number of requests frequently received, it is suggested that the resources of local libraries be investigated first. The services of the library are extended to organizations and individuals whose local resources are so limited as to make information otherwise unavailable. It is understood that the borrower agrees to pay shipping charges for sending him the loan material and for returning it to the library.

THE NATIONAL SOCIETY FOR CRIPPLED CHILDREN AND ADULTS Officers and Executive Committee

1949

Dr. John J. Lee, <i>Michigan</i>	President
William H. Jaenicke, <i>California</i>	President-Elect

George H. Williamson, <i>Illinois</i>	Vice President
Gerard M. Ungaro, <i>Illinois</i>	Treasurer
Lawrence J. Linck, <i>Illinois</i>	Secretary
Miss Louise Baker <i>Arizona</i>	Raymond J. Knoeppel <i>New York</i>
Mrs. Jack Carnes <i>Arkansas</i>	Dr. George A. Selke <i>Montana</i>
Paul Dietrich <i>California</i>	Roscoe L. Thomas <i>Texas</i>
Davis Geiger <i>Kentucky</i>	Parker Trowbridge <i>Massachusetts</i>

A nationwide organization with headquarters in Chicago and more than 2,000 member state and local societies for the crippled and handicapped throughout the country.

The Society's many projects and services are directed and supervised by professionally trained specialists. Services include health, welfare, education, rehabilitation, recreation, recruitment and training of specialized personnel, and employment for all types of handicapped persons.

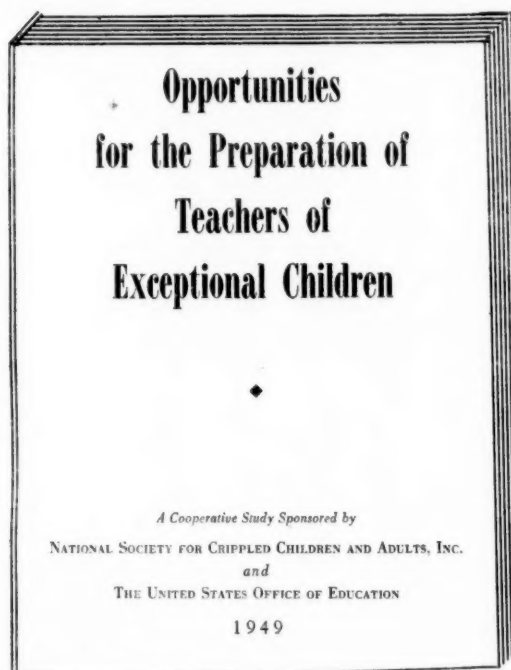

All services are established and carried out in a manner to supplement and extend and not to duplicate or compete with the services of any other agency, public or private. The National Society is supported by the annual sale of Easter Seals.
